MILK FLOW RACKING

Main Benefits

- » **Sell more** milk from cool room shelves permanently faced up... all day, every day
- » **Save more** because milk shelves require less maintenance and labour costs are lower
- » **Making you more profit**

Other Benefits

- » Milk remains faced up in perfect rows
- » Providing a superior presentation to milk crates
- » For easier customer identification and access
- » Rear loading allows fast, easy re-stocking
- » Rear loading allows stock rotation of short dated milk
- » Rear wheels allow removal for easy cleaning
- » Shelf heights are easy to raise or lower
- » Dividers easily adjusted for new relays
- » Strong and robust shelving and racking
- » Suitable for all cool room products
